

The Sign Language Translator:

Empowering Deaf and Hard of Hearing Communities

Real-time translation :

The app could include educational resources on ASL grammar, syntax, and culture, to help users better understand the language and its context.

Adjustable signing speed:

The app should allow users to adjust the signing speed to their preference, whether they want it faster or slower.

Multiple language support:

The app could support multiple languages, allowing users to translate from one language to another.
